**DIRECTIONS FOR USE**

VELOCITY is a blend of adjuvants designed to enhance the coverage and uptake of pesticides, especially fungicides.

VELOCITY can be used with all approved pesticides for use in agriculture, horticulture, forestry and industrial uses as specified

Crops / situations	Pesticides	Maximum concentration (% spray solution)	Maximum number of treatments	Latest time of application
All non edible crops	All Authorised plant protection products	0.5	Follow the statutory conditions of use of the plant protection product	Follow the statutory conditions of use of the plant protection product
All edible crops (stubble)	All Authorised herbicide plant protection products	0.5		
Non crop production	All Authorised plant protection products	0.5		
All edible crops	All Authorised plant protection products at half or less than half the authorised plant protection products rate	0.5		

VELOCITY can also be used with all pesticides approved for use on the following crops up to the growth stage listed at their full approved label rate in the table below.

Crop	Growth stages before which VELOCITY may be used with pesticides up to their full approved rate.	Crop	Growth stages before which VELOCITY may be used with pesticides up to their full approved rate.
Apple and Pear	Up to and including fruit 5-10mm	Oilseed rape	Up to and including 10% potential pods
Cherry and plum	Up to and including first fruit set	Linseed	Up to and including 10% capsules formed
Almond, apricot and peach	Up to and including first fruit set	Sugar beet	Up to and including 6 fully expanded leaves
Grapes	Up to and including first fruit set	Hops	Up to and including cone set
Strawberry	Up to and including first fruit development	Cereals	Up to and including GS52 (1/4 inflorescence)
Raspberry	Up to and including first fruit set	Forage maize	Up to and including tip of tassel visible
Blackcurrant	Up to and including first visible green fruitlet	Brussels sprout	Up to and including lateral buds begin to develop
Cucumber	Up to and including first fruit set	Potato	Up to and including tuber initiation
Tomato	Up to and including first fruit set on first truss	Cauliflower	Up to and including cauliflower heads begin to form: width of growing tip up to 1cm2
Broad bean, dwarf French bean, field bean, runner bean	Up to and including first pod set	Lettuce	Varieties forming heads: up to and including heads begin to form
Combining and vining pea	Up to and including flat pod (non-edible pods only)	Lettuce	varieties not forming heads: up to and including leaf rosette has reached 30% of the diameter typical for the variety
Edible podded pea	Up to and including pod set		

**RATE OF USE OF VELOCITY**

0.25 - 0.5% (0.25 - 0.5 Litres in 100 Litres per hectare spray volume).

**MIXING**

Half fill the spray tank with water and commence agitation. Add the recommended quantity of pesticide. Mix well and then add the required quantity of VELOCITY. Continue agitation while topping up the tank and during spraying.

Prior to using VELOCITY please consult your supplier for the latest recommendations.

**CONDITIONS OF SUPPLY**

All goods supplied by us are of high grade and we believe them to be suitable for the purpose recommended. Products are supplied solely for the use and applications recommended subject to strict adherence to the label conditions of storage and use. Other uses, applications and deviations from label recommendations are solely at the users own risk. Since we cannot exercise control over storage or seasonal factors affecting weather conditions, growth stage, crop condition and the composition of tank mixtures; NO liability or warranty is expressed or implied concerning the safety of tank mixtures or their biological effects on crop safety.
