

Bowdry

Turn waterlogged grass into playable greens with Bowdry, a revolutionary groundrying machine.

Professional Turf Care and Amenity Solutions

A revolutionary grounddrying machine, designed specifically to efficiently & effectively remove standing water from any surface.

Introduction

Manufactured by Bowcom, the Bowdry offers a light, strong, cost effective solution that ensures sport can continue when under normal conditions, standing water would prevent play.

How it works

Each Bowdry machine incorporates a durable foam roller that efficiently absorbs water. An integrated storage tank collects the excess water. Once full the tank can easily be emptied from the valve located on the side panel.

The Bowdry machine incorporates a four wheel chassis that evenly distributes the weight, ensuring effective water removal is achieved on even the finest turf.

Accessories & Replacement Parts

Storage Bag

Made from tough, heavy duty vinyl with an all round zip and carry handles. The storage bag is ideal for protecting against accidental foam tear.

The fully closed zip top keeps the machine clean and is also shower proof, whilst the handles allow the machine to be stored overhead, creating additional floor space.

Replacement Foam & Adhesive

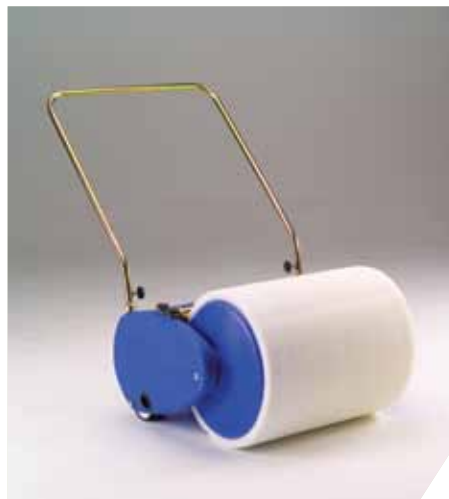

A new foam for your Bowdry, supplied with adhesive to allow you to replace the foam yourself.

Foam & Drum Exchange

A replacement foam and drum, factory fitted. We will arrange drum collection and re-delivery.

Key points

- Collects up to 60 litres of water per minute
- Lightweight & exceptionally easy to use
- Incorporates a durable foam roller that absorbs water and does not damage the turf
- Integrated storage tank that collects excess water and is emptied via a valve located on the side panel
- Delivered ready to use, simply unpack, slide on the handle and the machine is ready to use

Dimensions

Length:	68cm
Height:	46cm
Width:	86cm
Working width:	64cm
Weight (empty)	20kg

Areas of use

The Bowdry is the market leading tool for water removal. It is used at top sporting venues and facilities around the world.

Golf

Drying greens, fairways, practice areas and tees
