

Glyfos® Dakar Pro

A UNIQUE, WATER-SOLUBLE GLYPHOSATE TECHNOLOGY FOR EFFECTIVE TOTAL WEED CONTROL

Glyfos® Dakar Pro Key Points

MAPP No. 13147. Glyfos Dakar Pro contains 680g/kg of Glyphosate. (68%).

- Highest load glyphosate for enhanced performance
- Clean label - no hazard symbols
- Unique soluble granule formulation in easily disposable plastic bags
- Safer and easy to use
- 97% reduction in packaging
- No triple rinsing or disposal of containers required
- Can be applied through CDA applicators
- Each pack will treat up to 40,000m².
- Pack Size: 10kg

Dakar Pro is a dust-free, extruded, water-soluble granule with excellent handling characteristics.

The granules dissolve easily and each 10kg pack will treat up to 40,000m² (4 hectares). The design of the resealable packs ensures that they can be emptied completely with no rinsing.

A new accelerator surfactant technology combined with the high loaded glyphosate gives a more efficient and rapid uptake as well as faster translocation throughout the plant and down to the roots.

Weeds controlled	Rate of application	Rate of application with knap-sack sprayer (standard volume nozzle)	Rate of application with knap-sack sprayer (low volume nozzle)
Annual and perennial grasses and weeds	2.5kg/ha	250g/1000m ²	500g/2000m ²
Aquatic emergent weeds	2.5kg/ha	250g/1000m ²	500g/2000m ²
Floating weeds	3.0kg/ha	300g/1000m ²	600g/2000m ²
Forestry weeds	2.5-3.0kg/ha	250-300g/1000m ²	500-1000g/2000m ²

Use herbicides safely. Always read the label and product information before use. Please refer to the product label or our website for further technical information.

Waste packaging

Dakar Pro gives a massive 97% reduction in waste packaging compared to standard glyphosate products.

In addition, as the product does not require triple rinsing, there are significant time savings compared to liquid formulations. Working on 2 minutes to triple rinse an ordinary glyphosate container - a pallet of empty containers would take over 5 hours to triple rinse in order to comply with waste regulations.

STANDARD GLYPHOSATE 4 x 5L (TREATS 4 HECTARES)

Per 4 x 5L (4 hectares)	Weight of empty cans	Weight of empty cardboard outer	Total weight of waste packaging
	1120g	850g	1970g

DAKAR PRO 1 x 10kg bag (TREATS 4 HECTARES)

Per 10kg (4 hectares)	Weight of empty bag	Total weight of waste packaging
	60g	60g

How to use the product

Glyfos Dakar Pro is easily measured out with a calibrated jug. The cold water-soluble grains dissolve readily and there is no mess with dripping cans or spillage.

Areas of use

Use on areas such as hard surfaces, paved areas, highways and industrial sites.

Can be used around trees and shrubs in landscaped areas and forestry situations.

Dakar Pro is also recommended for aquatic areas. Dakar Pro can be used with CDA sprayers capable of producing a VMD of 200 microns.
