## Helly Hansen technical guide

### HELLY TECH® PROTECTION

HELLY TECH® is the waterproof and breathable outer layer between you and the elements. The unique membrane stops water molecules going in, but lets the moisture molecules escape. Keeping you dry from the outside and comfortable on the inside. There are numerous layers of HELLY TECH® Fabrics, the main differentiator is the number of layers the fabric is built from.

### HELLY TECH® PROFESSIONAL

Extremely waterproof and breathable design and constructions. For extremely wet or long-lasting activities in harsh conditions.

### HELLY TECH® PERFORMANCE

Highly waterproof and extra breathable sport specific design and constructions. For a wide range of high performance outdoor activities during unpredictable and challenging weather.

### YKK®

Little parts, big difference. High quality zippers for all purposes, YKK® is a Japanese company, and the industry leader for quality and innovative zippers and closures.

BLUESIGN® provides an holistic solution for safe and environmentally friendly textile production. Working at each step of the supply chain to ensure that products meet rigorous benchmarks focusing on people, environment, and resources.

The world's best down alternative. PRIMALOFT® is a synthetic insulation technology offering superior thermal properties with excellent water repellences. Made up of ultra-fine fibres that form air pockets to trap heat inside whilst offering super softness.

Developed in cooperation with PRIMALOFT®. LIFALOFT™ is a combination of LIFA®'s unique insulation structure and PRIMALOFT®'s extensive knowledge in synthetic insulation, providing a lighter and still warmer than standard insulation.

The BOA® Fit System enables faster, more powerful directional changes through equipment and body, while giving power without compromising the precision. Go further with endurance and your health to help improve circulation and efficiency. Engineered with high quality, durable materials, and vigorous testing the BOA® Fit System is guaranteed to perform in any environment.

Since 1854, AMANN has been one of the leading international manufacturers of high-quality sewing threads, embroidery threads and smart yarns.

## CE markings

EN342: 2017

### Protection against the cold

The standard specifies test methods and requirements in protective clothing ensembles which are intended to protect against cold (air temperature below -5°C). The standard is taking into account not only low air temperatures but also humidity and air velocity. Helly Hansen has tested its products according to method B, which means that the thermal insulation has been measured for a garment ensemble (jacket + pant or coveralls) with a base layer. The value is representing protection for a wearer performing light or moderate activity. The protection can only be guaranteed if the complete ensemble is worn.

Value 1 = Thermal insulation value of the ensemble (with underwear b), icler

Value 2 = Air permeability, class 1 – 3 (class 3 is the most permeable)

Value 3 = Water penetration (optional), WP

EN343: 2019

### Protection against the rain

The standard specifies requirements and test methods for the performance of materials, seams, and ready-made garments for protection against rain, snowflakes, fog and ground humidity. Resistance to water penetration and water vapour resistance is tested.

Value 1 = Resistance to water penetration, class 1 - 4 (class 4 is the best waterproofness).

Value 2 = Water vapour resistance, class 1 – 4 (class 4 is the highest permeability).

Value 3 = Rain tower test (optional test of readymade garment).

Preparing and managing sports surfaces, landscapes and green spaces that require working in an array of weather conditions.

We have utilised over 20 years experience of procuring and advising workwear and PPE to select quality, purpose designed attire to keep professionals protected and productive, whatever the weather or task they are undertaking.

Our extensive experience working with grounds managers, golf course managers, landscapers and contractors means we understand the footwear, waterproofs and workwear which will provide comfort, quality and longevity for challenging, high intensity outdoor work requirements.

Working with leading workwear brands including Helly Hansen®, Regatta® and Craghopper, our range includes selections to suit different budgets and requirements. We understand our customer's seasonal workwear requirements and team presentation needs and have experience of kitting teams out for global broadcast events, where professionals can be under the highest media scrutiny.

Our BASIS trained commercial and technical teams have selected the PPE required for tasks which may involve noise, vibration and/or application of hazardous or professional pesticide products.

We're proud to work with reputable suppliers and select products where ethical and sustainable values are core, and where the protection of our planet and people are considered.

- UPF 40
- Buttoned front placket
- Slit split
- Extra button included

#### Colours:

White, Mid Grey, Navy, Ebony, Black

#### Fabric:

100% Polyamide - 185 g/m<sup>2</sup>

#### Sizes:

S-4XL

## Manchester 2.0 softshell vest

A durable, versatile vest that provides some protection from the weather and wind while remaining very comfortable with a clean look and good fit for both men and women. Recommended when you need a little extra warmth on the upper body and works great as an insulating midlayer.

### Distinguishing features:

- OEKO-TEX® approved main fabric and BLUESIGN® approved product
- PFC-Free DWR
- Softshell fabric with membrane and DWR
- No shoulder seams
- Brushed fleece inside collar
- YKK® front zipper with chin protector
- Hand pockets with YKK® zipper
- Available for men and women

### Colours:

Men's - Grey Fog, Navy, Black  
Women's - Red, Grey Fog, Navy, Ebony, Black

### Fabric:

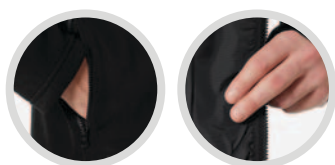

94% Polyester, 6% Elastane - 290 g/m<sup>2</sup>

### Sizes:

Men's - S-4XL  
Women's - S-3XL

EN14058: 2017

## Manchester 2.0 fleece jacket

The Manchester fleece jacket is both comfortable and warm. Can be worn on its own as a midlayer for those colder days.

### Distinguishing features:

- OEKO-TEX® approved main fabric
- EN 14058:2017 Class 1
- YKK® front zipper with chin protector
- Hand pockets with YKK® zipper
- Extended back for improved comfort
- Available for men and women

### Colours:

Navy, Black

### Fabric:

100% Recycled polyester - 320 g/m<sup>2</sup>

### Sizes:

Men's - S-4XLs  
Women's - S-3XL

**REGATTA**   
PROFESSIONAL

## Thor III fleece jacket

The perfect layering piece, featuring an anti-pill fabric, providing long-lasting wear. With its quick-drying ability, moisture is drawn away from the skin to keep you comfortable and fresh.

### Distinguishing features:

- 280 series anti-pill symmetry fleece
- Quick drying
- Easy care
- Super soft handle
- Special Features
- Interactive
- Fleece cuffs
- 2 zipped lower pockets
- Adjustable shockcord hem

### Colours:

Bottle Green

### Fabric:

100% polyester

### Sizes:
