Absolute Premier

*A range of mini-granular,
compound fertilisers.*

*growing through
innovation*

Absolute Premier

The Absolute Premier range of mini-granular, compound fertilisers is formulated specifically for use on areas such as golf fairways, football and rugby pitches, racecourses, and ornamental turf.

Absolute Premier is available in a wide range of analyses, each giving precise control over nutrient input levels throughout the year. The mini-granules (1-3mm) are formulated to provide even and consistent coverage along with a rapid turf response.

Key benefits

- 4-8* weeks conventional release fertiliser
- Broad range of analysis for use all year
- Mini homogenous granules for even and consistent coverage
- Rapid turf response when required

*Depending on environmental factors

Absolute Premier analysis	Premier 6:9:6	Premier 12:6:6	Premier 20:10:10	Premier 9:7:7	Premier 3:3:12
	%	%	%	%	%
TOTAL NITROGEN	6	12	20	9	3
Ammoniacal Nitrogen	6	12	10.7	9	3
Ureic Nitrogen	-	-	9.3	-	-
Phosphorus Pentoxide (P ₂ O ₅) - Oxide	9	6	8	7	3
Potassium Oxide (K ₂ O) soluble in water - Oxide	6	6	10	7	12
Magnesium Oxide (MgO) - Oxide	-	-	-	-	-
Calcium Oxide (CaO) - Oxide	13.2	8	2.7	10.6	12
Sulphur Trioxide (SO ₃) - Oxide	25.8	38.5	23	32.7	21.6
Iron (Fe) - Elemental	-	-	-	-	-

Absolute Premier spreader settings

Accupro 2000				
Application rate g/m ²	Cone setting	Single pass	Double pass	Spread width (m)
25	6	N	K	3.9
30	6	O	K 1/2	3.9
35	6	P	L	3.9

Application timings key ● Main usage period ● Extended usage period

Apply evenly, avoiding overlapped or missed areas, using a suitable calibrated spreader. If no rain falls during the 24 hours after application, irrigate the treated area thoroughly. Do not apply in frosty weather or hot, dry conditions.

Absolute Premier Range

Absolute Premier 20:10:10

A balance of urea and ammoniacal nitrogen source helps promote healthy sward growth. The homogenous granulation can be applied to many turf surfaces, including sports pitches, lawn, and general amenity areas.

The balance of phosphorus for root and seedling development, with matching potassium input for defence, turgor and drought tolerance provides long lasting performance.

Application timings:

Longevity	Granule size	SGN	Cutting Height	Application rate	Bag Coverage (turf)	Bags/ha
6-8 weeks	1.0-3.0 mm	200	>6 mm	25-35g/m ²	800-571m ²	13-18

Absolute Premier 9:7:7

A balanced NPK fertiliser for use on outfields and fairways.

The homogenous granules break down quickly to give rapid uptake of the nutrients to the plant. The availability of ammoniacal nitrogen ensures a fast response in the spring and responsive autumn recovery as soil temperatures cool.

- Steady, dependable growth without loss of control
- Provides a rapid response for outfield turf during the main growing season

Application timings:

Longevity	Granule size	SGN	Cutting Height	Application rate	Bag Coverage (turf)	Bags/ha
4-6 weeks	1.0-3.0 mm	200	>6 mm	25-35g/m ²	800-571m ²	13-18

Absolute Premier 3:3:12

A high phosphate and potash fertiliser that stimulates deep root growth, helping grass cope with the extra wear from winter games. Provides useful amounts of phosphate and potassium but without excessive nitrogen.

- Encourages deeper rooting in high wear situations
- Helps turf deal with stress in the autumn and winter months

Application timings:

Longevity	Granule size	SGN	Cutting Height	Application rate	Bag Coverage (turf)	Bags/ha
4-6 weeks	1.0-3.0 mm	200	>6 mm	25-35g/m ²	800-571m ²	13-18

growing through **innovation**

Absolute Premier Range

Absolute Premier 6:9:6

A pre-seed and general-purpose fertiliser with an ideal balance of NPK. Incorporate 25-35 g/m² in the top 5cm of soil, prior to seeding or turfing. The ammoniacal nitrogen encourages rapid establishment, high phosphorous content enhances root formation and the potassium element aids tolerance to drought stress.

- Ideal nutrient balance
- A natural choice for new turf areas
- Improves speed of establishment when seeding or turfing

Application timings:

Longevity	Granule size	SGN	Cutting Height	Application rate	Bag Coverage (turf)	Bags/ha
4-6 weeks	1.0-3.0 mm	200	>6 mm	25-35g/m ²	800-571m ²	13-18

Absolute Premier 12:6:6

Ideal growing season analysis, containing ammoniacal nitrogen. Contains a balanced ratio of phosphorus and potassium, macro nutrients required for many essential plant processes, including photosynthesis and respiration, root development and cell turgor for drought tolerance.

- Ideal maintenance treatment for lawns, outfield areas, sports pitches, and golf fairways
- Gives turf a natural green colour without high level iron input
- Cost-effective turf management

Application timings:

Longevity	Granule size	SGN	Cutting Height	Application rate	Bag Coverage (turf)	Bags/ha
4-6 weeks	1.0-3.0 mm	200	>6 mm	25-35g/m ²	800-571m ²	13-18
