

Qualibra

RECOMMENDED USAGE:
✓ MANAGED AMENITY TURF

Premier wetting and water conservation agent that optimises water penetration then distributes it deep and evenly through the rootzone.

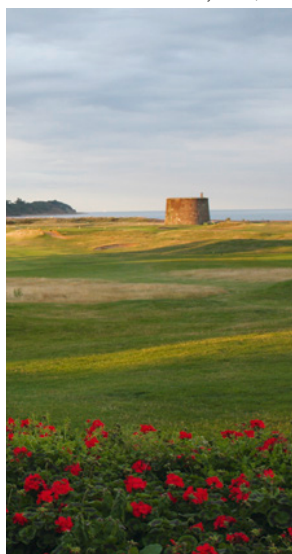

Qualibra combines a unique and dynamic penetrant with a powerful polymer to optimise water penetration and distribution within the rootzone.

Qualibra has the ability to prevent the development of Dry Patch and also invigorate root and plant health. Independent trials have confirmed the very highest levels of performance.

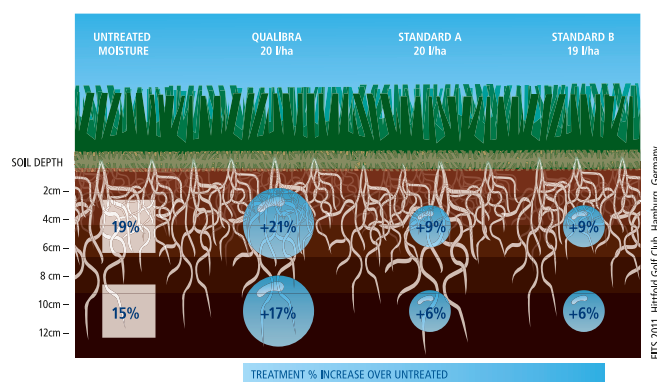

Qualibra BENEFITS

- Holds water deeper
- Maintains plant health and playing surface quality
- Prevents damaging Dry Patch developing
- Makes better use of irrigation resources
- Retains healthy root mass

Felixstow Ferry Golf Club, Suffolk

Qualibra moves and retains moisture deeper

EFIS 2011, Hirtfold Golf Club, Hamburg, Germany

WETTING AGENT

Directions For Use

- Qualibra is designed for use on all areas of golf courses, sports fields and other amenity turf areas.
- It is well tolerated by all major turf species and allows rain and irrigation water to enter into the root zone in areas that were previously affected by localised dry spot.
- Prevent spray drift onto surrounding areas.
- Do not apply when ground is frozen.
- Apply Qualibra at approximately monthly intervals in a preventative programme to prevent the development of localised Dry Spot and aid water management.
- Qualibra would typically be applied from early spring to autumn, but can be applied throughout the year if required.
- Ensure the sprayer is clean and set to give an even application at the correct volume and an even deposit.
- Half fill the spray tank with clean water and commence agitation. Add the required quantity of Qualibra to the spray tank. Complete filling to the required volume and continue to agitate throughout the spraying operation.

Application Rate:

Maximum individual dose: 20 litres per hectare
Water volume: 500-1,000 litres per hectare

Product Characteristics

Pack size: 10 litre
Packs per outer: 10 litre
Pack coverage: 5,000m²

Recommended Period of Use weather permitting

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
